

RCS Testing

The time is now

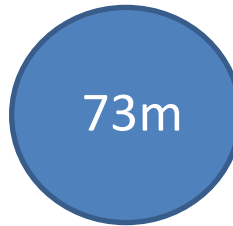

TesTime

Success in Mobile Testing

15 million subscribers by the end of 2013

73 million subscribers by 2016

The stats don't lie; RCS is clearly the next big thing in mobile communications.

Key players are already embracing RCS. 8 leading networks have already launched (including in France, Germany and Spain), and the majority major operators committed to launch.

With such fast-moving momentum, all roads lead to RCS becoming a permanent part in the long-term future of mobile communications. If you want to remain ahead of the game, the time is now to introduce RCS into your product life cycle.
